PC-Crash is the world's first commercial and fully integrated 3D air and land traffic simulation program. Additionally, it simulates road vehicles and shipping traffic. In real time, the program processes 2D and 3D sensor data and displays the results, which can be graphically manipulated. PC-Crash's three engines allow you to simulate road traffic (2D and 3D), ship traffic and airport traffic, and air traffic. You can save the results of your simulation in 2D or 3D with lossless compression and in high resolutions. In summary, PC-Crash simulates every traffic participant and every traffic regulation independently, and enables to simulate the interaction of various traffic participants. PC-Crash offers a large number of simulation and control options and ensures top of the line graphic results for high quality screen displays. A new synthesis of isoindigo derivatives via iodine-mediated regioselective ring-expansion reaction. A straightforward and efficient protocol for the construction of isoindigo derivatives via iodine-mediated regioselective ring-expansion reaction of isoindigoquinone is described. The reaction has been applied to the synthesis of isoindigo derivatives bearing an aldehyde group. The synthetic protocol is compatible with a variety of functional groups, and provides rapid access to isoindigo derivatives with structural complexity. Q: Unity3D and the tablet UI (WYSIWYG) I'm trying to figure out how to go from a touch screen app to a tablet UI (WYSIWYG) using Unity 3D. I would like to get an idea as to how to go about that. Is it as simple as using a different layout for the screen, or is it a big job? Is there anything I should look out for? I've been doing the research but I'm only finding info on the games being published by Unity. I'm more interested in knowing what I need to change to make the transition smooth and what pitfalls I might run into. This is what I came up with in my head so far. (If there's an existing API or feature that I should know about, I'll gladly change my mind) UI/Game Screen 82157476af
