Aw, Dad, not now...

I am a Romanian :). Genuinely great game, but the free portion of it is pretty bad.. I absolutely love unit packs, I love looking at the cool designs for each culture, I love the detail and research that goes into them. However most unit packs come seperately and are \$2 a peice. So having four in a deal together for \$6 is great. Plus the adition of other content makes it definately worth it for me.. Fun and full of silly references to other games, series and movies. Monkey Island references are in there, so are Dr. Who, Bioshock, etc. etc. It is more fun if you actually know the references. That said, the controls are a little gimmicky, but you are not punished too much for failing. The idea of replaying stories with different outcomes is also quite interesting. It is rather short though and at the time of writing a teaser for 'chapter 2' plays at the end. This will take you a few hours at most.. Horrendous.

Very very poor.

This might have been a poorly written program on a 1980s computer. This is not even up to the standards of that decade.. Dark story dispite the perfect world it sets up. I like it!

Clunky but challanging gameplay

Just needs to open itself at the user perfered settings

This game needs optimization, the lag is atosious for a sprite based game.. Tidalis is a 2D puzzle game that is kinda a cross of match-3 and Tetris. Blocks of various colors drop from the top of the board, and the player can click any block to cause a stream to move in the direction(s) the arrow on the block points. If it hits one of the same color, it's redirected in the way ITS arrow points, up to 3 blocks each step. It's a simple premise, but Tidalis contains an almost limitless number of spins on this basic format with special modes, block types, speeds, gravity, and any number of other ways to mix up the formula. for the price which this game frequently goes for, it's absolutely worth the price.

My one negative aspect to this game is the adventure mode - it's very long, and a large number of the levels rely too heavily upon luck of what the board looks like in its initial state: many levels are only rarely winnable, so it can be frustrating to try to work your way through the campaign and have to restart a level repeatedly just to get favorable conditions.

At any rate, it's unique among match 3 games, so if you're looking for something that feels both familiar and unique, you should give this a look.

This game focuses on FUN! Wanna launch yourself out of the map? Do it! Wanna go in loopy loops, glitching through them? Do it! I also played the stuntmania jr game a metric ton so this is nostalgic. For 5 bucks I can't recommend this enough!. biocock inbred. Awesome little Indie game. Great puzzle / platformer. The puzzles were just right, not too hard and not too easy. Great visuals as well. Wish they had more parts outside. Definitely would recommend to anyone who wanted to kill a few hours.. Dynamite Jack feels like a Finnish homebrew from the nineties. I wager that this was a game that was made technology first, design later. The story is slapped on, the art direction is nonexistent, the levels are simple and uninteresting and the game introduces pretty much all of its few features in the first couple of levels. I see no reason to recommend nor play Dynamite Jack.. This game is terrible and hard to play. There are seemingly impossible tracks that you MUST pass to continue, and no matter how many times I try and perfect my path to the end, it's still not possible. No wonder this game has a score in the 30s.. it has really bad frame rate
. cant complete the game without walkthrough
but still its a masterpiece
one day i can complete half life 2 without walkthrough
This game is like donkey kong & mario but with explosive barrels

this game is gold. I don't know if I already made a remark but this Add-On is the worst I have downloaded. You enter the map, it is unnecessarily crowded, which causes frame rates to plummet which causes your bus to do more spazzing out/jumping that properly driving. At 43 dollars, I expected quality, not a giant pain in the and headache. Also really? Another Mercedes Benz Citaro??? All the routes pretty much follow the same roads (when the map is stable enough to run, which is never) so it's the same old runs (which are too tight to keep up with) and the scenery? It looks like flattened images of crowds of people, water, and trees.

I cannot for the life of me recommend this map to ANYONE. Try Berlin X10, Chicago Downtown, or even Grundelphia (found on Vtransitcentre.com). I would very much prefer a full refund but I'm not sure about the likelihood on that.
